Staining

You wouldn't purchase a car unpainted, would you? Why should your windows be any different? Binq windows are factory finished in a range of stains with products that are designed specifically for doors and windows. It consists of a two part process where the first application is dipped which treat it's rot and infestation and eliminates brush marks, then hung in the drying room in a controlled temperature. There then spray coated multiple times covering the product in approximately 300 microns, which is the process that reduces the maintenance significantly.

Blackwood
