

Tilt Turn windows are a staple for the building industry in Europe. Why? With the turn of a handle the window tilts in at the top, promoting passive and secure ventilation, keeping your house fresh but safe from burglary. Turn the handle again and the window turns in like a door, giving you rapid ventilation and the ability to not only clean the window from inside but also escape in an emergency. Binq Tilt Turn windows lock in a minimum of 5 spots, have double EPDM rubber gaskets, come in double or triple glazing and can be larger than most doors. Add to this Binq factory finishing and a range of Italian handles and you have everything you'll ever need in a window.

**Hardware**

Hautau – German Made  
 Multi-point locking system  
 Fully adjustable hinging  
 Double Gaskets: EPDM rubber

**Weight**

Up to 130kg per panel

**Dimensions**

Single 2.40m high  
 Single 1.40m wide  
 French 2.40m high  
 French 2.80m wide

**Performance**

uVal as low as 1.5  
 SHGC as low as .17

**Staining**

You wouldn't purchase a car unpainted, would you? Why should your windows be any different? Binq windows are factory finished in a range of stains with products that are designed specifically for doors and windows. It consists of a two part process where the first application is dipped which treat it's rot and infestation and eliminates brush marks, then hung in the drying room in a controlled temperature. There then spray coated multiple times covering the product in approximately 300 microns, which is the process that reduces the maintenance significantly.
